

Municipality of *Bluewater*

Notice of Public Meeting

ALTERNATE DRINKING WATER SOURCE FEASIBILITY STUDY (*Community of Zurich*)

Public Meeting

The Municipality of Bluewater has conducted a feasibility study into alternate water supply options for the community of Zurich. Recent investigations established that the existing system currently meets provincial water quality standards. However, alternative options are being considered to meet future demand and storage needs.

A Public meeting has been scheduled to present details of the feasibility study to local residents in order to obtain their feedback. A preferred option, complete with costs, has been identified; public input is being sought before moving forward. Representatives of the Municipality and Project Engineers from BM Ross will be in attendance.

PUBLIC MEETING

DATE: Monday May 13, 2019

LOCATION: Zurich Community Centre (15 East Street, Zurich)

TIME: 7:00 pm–9:00 pm

PRESENTATION: 7:30 pm
